ORHAN ESD

LI20666

DESCRIPTION

Safety shoe characterised by ergonomic design and detail-oriented construction, ideal for prolonged use at work. The soft suede upper with padded gusset offers comfort and flexibility, while the lightweight, impact-resistant aluminium Alutoe toecap provides effective protection. Safety is also ensured by the SAFE-System anti-puncture system, which prevents injuries from sharp materials. The Wind 3D lining ensures excellent breathability, keeping the foot dry in every situation.The PU sole has a lightweight heel and offers excellent non-slip grip on various surfaces, as well as high abrasion resistance. The Infinergy® insert reduces fatigue and returns energy with every step. BASF's ergonomic elastopan footbed, together with the PU and Infinergy® midsole, reduces fatigue through superior elastic response. S1PS FO SR certified protection, available from size 38 to 48. It also has the additional ESD requirement for use in environments with risk of electrical dissipation.
