

BRADLEY s ESD

0RV20144

DESCRIPTION

The **Bradley** model with **breathable Nylon upper** and **anti-abrasion film on the toe cap**, is a **super light summer work footwear**. The **innovative sole** made with an extra light new generation PU compound, and the **new anti-puncture system** significantly reduce the overall weight of these **lightweight safety shoes**, while ensuring maximum grip and protection of the sole of the foot. The **AirToe Aluminium** toe cap in turn contributes to the lightness of the shoe, making the Red Leve line **the lightest safety shoes** in the U-Power range. **Men's and women's work shoes** with **non-slip**, **abrasion-proof**, **anti-oil** and **antistatic** outsole ideal **for warehouse workers**, **transport and logistics personnel**, **carpenters**, **electricians** and **craftsmen** in general. And, of course, comfort and long lasting well-being are guaranteed by the **Wingtex® air tunnel lining** and the **antibacterial** and breathable **U-Power Original insole** in light polyurethane compound.

UPPER

Breathable nylon and scuff cap protection in anti-abrasion material

LINING

Wingtex® with breathable air tunnel

TOECAP

AirToe Aluminium

ANTIPERFORATION

Save & Flex Air

MIDSOLE

U-Power Original

SOLE/TREAD

New generation anti-abrasion, anti-oil, anti-slip and antistatic PU compound

ANATOMICAL INSOLE

Natural Comfort 11 Mondopoint

SAVE & FLEX AIR

Save & Flex Air anti-perforation insert. Ultra-lightweight (extralight) protective insert designed to effectively protect the foot from nails and sharp objects without adding extra weight to the footwear. It provides high safety standards, flexibility, and full-foot plantar coverage, enhancing dynamic comfort during movement.

PROTECTION CLASS

S1PS FO SR

EU NORM

EN ISO 20345:2022 S1 PS FO SR

SIZES

35-48 (UK: 2-13)

AIRTOE ALUMINIUM TOE CAP

Made from aluminium to combine lightness with protection, ensuring thermal and dynamic comfort for the foot. Weighing approximately 54 grams, it is designed to maintain high safety standards without adding weight to the footwear.

ESD (ELECTROSTATIC DISCHARGE)

Technology designed to continuously dissipate electrostatic charges accumulated by the human body to the ground. Certified footwear complies with the requirements of the CEI EN 61340 standards for the protection of electronic components, making it suitable for use in EPA (Electrostatic Protected Area) environments during both production and handling of sensitive devices.
