

Model: BRADLEY s ESD

EU Norm: EN ISO 20344:2021

Article: 0RV20144

DESCRIPTION

The Bradley model with **breathable Nylon upper** and **anti-abrasion film on the toe cap**, is a **super light summer work footwear**. The **innovative sole** made with an extra light new generation PU compound, and the **new anti-puncture system** significantly reduce the overall weight of these **lightweight safety shoes**, while ensuring maximum grip and protection of the sole of the foot. The **AirToe Aluminium** toe cap in turn contributes to the lightness of the shoe, making the Red Line **the lightest safety shoes** in the U-Power range. **Men's and women's work shoes** with **non-slip, abrasion-proof, anti-oil and antistatic** outsole ideal **for warehouse workers, transport and logistics personnel, carpenters, electricians and craftsmen** in general. And, of course, comfort and long lasting well-being are guaranteed by the **WingTex air tunnel lining** and the **antibacterial** and breathable **U-Power Original insole** in light polyurethane compound.

UPPER

Breathable nylon and scuff cap protection in anti-abrasion material

LINING

Wingtex® with breathable air tunnel
