

Model: CAESAR s ESD

Protection Class: S3S CI FO SR

Article: RV20324

EU Norm: EN ISO 20344:2021

DESCRIPTION

Safety shoes with BOA® Fit System - precise, micro-adjustable and durable. These **water-repellent safety footwears** with a soft Nubuck-effect micro-fibre upper **reduce the weight of the shoes** thanks to the innovative sole made of latest-generation, ultra-light PU compound. **Non-slip safety shoes** with **abrasion-resistant, oil-resistant** and **anti-static** sole. Safety is guaranteed by the **Save & Flex Air anti-perforation system** consisting of a hole-resistant fabric insole that makes this style of **work shoe lighter** than traditional styles. The use of highly **innovative materials** to produce the sole and anti-perforation system combined with the **AirToe Aluminium toe cap** which weighs just 54 g. has resulted in a **significant reduction in the overall weight of the work shoes**, making them more comfortable and better performing for the worker's long-term well-being. **Safety shoes** with special protection of the sole against the cold (at temp. ≤ 10 °C.), **ideal for: transport and logistics sectors, electricians, carpenters, artisans, and warehouse workers. Guaranteed comfort and well-being for feet** is also provided by the **U-Power Original** insole with anatomical, anti-bacterial and self-modelling properties plus the WingTex air tunnel **lining** which ensures **excellent breathability. Safety shoes for men and women.**

UPPER

Nubuck-effect, water-repellent microfibre
