

Model: CHUCK s ESD

Protection Class: S3S CI FO SR

Article: LI20634

DESCRIPTION

A low-profile safety shoe designed to ensure maximum safety and comfort in the most demanding working environments. Manufactured with a PUTEK® PLUS upper that is water-repellent, breathable and highly abrasion-resistant, this shoe incorporates a light and resistant aluminium Alutoe toe cap that absorbs shocks and compression without weighing down the foot. The SAFE-System anti-puncture system prevents accidental injury from nails or sharp materials. The white calfskin lining is soft and pleasant to the touch, while the PU sole with lightweight heel ensures high stability and superior traction thanks to its non-slip construction. The soft midsole with Infinergy® technology improves cushioning and returns energy with every step. S3S CI FO SR safety certification and sizes available from 38 to 47. An ergonomic BASF elastopan footbed and a non-slip PU sole with a lightweight, oil- and abrasion-resistant heel complete the product. S3S CI FO SR certified, it is available in sizes 38 to 47. It also has the additional ESD requirement for use in environments with a risk of electrical dissipation.

UPPER

PUTEK® PLUS highly abrasion-resistant, water-repellent and breathable

LINING

Soft white calfskin

TOECAP

Alutoe - Lightweight aluminium toe cap
