

JAKE s ESD

LI30076

DESCRIPTION

The LUPOS® safety shoe, with electrostatic and anti-puncture protection, is designed to guarantee a long-lasting wellbeing of the foot. Sandal, light, soft and durable, with oil-resistant upper in black full-grain leather and velcro closure.

Thanks to its sole with the exclusive and innovative Infinergy® system, these work shoes ensure a lightness and a comfort without compromise. The lining of these safety shoes is super breathable and absorbent with air channels to improve the soaking up of moisture caused by sweating of the foot. The ultralight aluminum toe cap with CapLight technology ensures 50% less weight and is antimagnetic and corrosion resistant. The non-slip polyurethane foam sole ensures stability of the posture, while the multi-functional heel offers greater grip on the stairs.

This work shoe, perfect in summer, meets the S1PS FO SR safety standards and is suitable for use in humid environments, outdoor work sites, transport and logistics.
