

# JERRY o ESD

LE20042

## DESCRIPTION

Eco-sustainable work shoes, water repellent and breathable: with New Safety Dry upper with a high percentage of recycled material. These low-cut safety shoes respond to the requirements of the standard protection S2 FO SR, which makes them ideal for persons working in contact with slippery surfaces, in that the sole of these shoes is designed for keeping maximum grip to the terrain or surface. The Wind 3D lining, with its microcells, ensures maximum breathability because they absorb and disperse moisture. The safety of the toes and the front part of the foot is ensured thanks to the CompoToe toe cap in composite material. Anti-static work shoes with sole in 100% PU by BASF, anti-abrasion, anti-static, anti-oil and anti-slip, designed to ensure maximum stability. Safety work shoes ideal for industry and the chemical sector.

## PROTECTION CLASS

S2 FO SR

## EU NORM

EN ISO 20345:2022

## UPPER

New Safety Dry - water repellent, breathable with a high percentage of recycled material

## LINING

Wind 3D

## TOECAP

CompoToe Composite

## ANTIPERFORATION

none

## MIDSOLE

-

## SOLE/TREAD

100% renewable PU by BASF, anti-abrasion, anti-static, anti-oil and anti-slip

## ANATOMICAL INSOLE

Natural Confort 11 Mondopoint
