DESCRIPTION

Eco-friendly safety shoes in soft microfibre with a high percentage of recycled material. Work sandals in standard protection S1PS FO SR designed to ensure long-lasting comfort and wellness of the feet, in addition to the best safety. Ultra-breathable Wind 3D lining that, thanks to its microcells, absorbs and disperses moisture. The comfort of these S1PS safety shoes is increased by the LUPOS maxi soft sock liner in PU by BASF that contributes to an optimal fit. The CompoToe Composite safety toe cap protects the toes and the front part of the foot while the GREEN SAFE System anti-puncture system ensures maximum protection of the entire sole of the foot. The sole of these eco-friendly work sandals is in 100% renewable PU by BASF and is anti-abrasion, anti-static, anti-oil and anti-slip. The sole ensures maximum stability even on the most slippery surfaces, responding to the requirements of the SRC standard. Anti-slip work shoes ideal for industry, logistics, assembly line and automotive.
