

LEANO ESD

LA20094

DESCRIPTION

Safety shoes designed for protection, comfort and durability, ideal for those working in environments requiring certified safety and maximum breathability. Made with New Safety Dry uppers, these work shoes are highly water repellent and ensure effective ventilation thanks to the breathable fabric. The CompoToe Composite toecap protects the foot from impact and compression, offering lightness and comfort all day long. The Wingtex® lining with ventilation channels keeps the foot dry and cool even after prolonged use. BASF's ergonomic elastopane footbed with maxi-soft technology promotes the well-being of the foot, while the anti-static, wear-, oil- and slip-resistant PU/PU sole ensures stability and grip in every situation. Certified S2 FO SR protection, available in sizes 38 to 48. It also has the ESD requirement ideal for use in environments where there is a risk of electrostatic stress.
