

MICHELLE s ESD

0RV20086

DESCRIPTION

Lightweight women's safety shoes with **ultra-breathable nylon upper** and pink contrast-colour side bands. Abrasion-resistant scuff cap to **protect the tip**. **U-Power Original insole** in light and breathable polyurethane compound for a feeling of maximum comfort. **Wingtex® air tunnel lining** with special microcells for the absorption and dispersion of moisture. These **women's safety shoes** use new materials that drastically reduce their weight, ensuring lightness not only in the perception of heat but also in movement. The **super light tread**, with a new generation PU compound and the new **puncture-resistant insole**, and the **AirToe Aluminium toecap** ensure protection during use, while keeping the shoe extremely light. **Women's safety shoes** suitable for dry environments and, more specifically for **warehouse workers**, **trucking and logistics**, **carpenters**, **electricians** and **craftsmen** in general.

UPPER

Breathable nylon and abrasion-resistant scuff cap to protect the toe

LINING

Wingtex® with breathable air tunnel

TOECAP

AirToe Aluminium

ANTIPERFORATION

Save & Flex Air

MIDSOLE

U-Power Original

SOLE/TREAD

Abrasion-resistant, oil-resistant, no-slip and anti-static in a new generation PU compound

ANATOMICAL INSOLE

Natural Confort 11 Mondopoint

SAVE & FLEX AIR

Save & Flex Air anti-perforation insert. Ultra-lightweight (extralight) protective insert designed to effectively protect the foot from nails and sharp objects without adding extra weight to the footwear. It provides high safety standards, flexibility, and full-foot plantar coverage, enhancing dynamic comfort during movement.

PROTECTION CLASS

S1PS FO SR

EU NORM

EN ISO 20345:2022 S1 PS FO SR

SIZES

35-42 (UK: 2-8)

AIRTOE ALUMINIUM TOE CAP

Made from aluminium to combine lightness with protection, ensuring thermal and dynamic comfort for the foot. Weighing approximately 54 grams, it is designed to maintain high safety standards without adding weight to the footwear.

ESD (ELECTROSTATIC DISCHARGE)

Technology designed to continuously dissipate electrostatic charges accumulated by the human body to the ground. Certified footwear complies with the requirements of the CEI EN 61340 standards for the protection of electronic components, making it suitable for use in EPA (Electrostatic Protected Area) environments during both production and handling of sensitive devices.

U-POWER ORIGINAL

Anatomical footbed with arch support structure made from a soft dynamic BASF compound. It features self-moulding properties designed to evenly distribute body weight pressure across the sole of the foot, reducing pressure points and optimizing dynamic comfort.
