

Model: **NELSON s ESD**

Article: 0RV10214

Protection Class: S3S CI FO SR

EU Norm: EN ISO 20344:2021

DESCRIPTION

Hi-top water repellent safety shoes with Nubuck-effect, micro-fibre upper and latest-generation **ultra-light** PU mix sole which significantly reduces the overall weight of the footwear. **Lightweight and comfortable safety boots**, ideal for cold and damp environments. The special CI **protection of the sole against the cold** (At temp. ≤ 10 °C.) makes the style suitable in all working conditions with frequent exposure at low temperatures, such as **warehouse workers, logistics and transport, plumbers, electricians, mechanics**, etc. Foot protection is ensured by the **AirToe Aluminium toe cap** and the Save & Flex Air all-fabric **anti-perforation insole**. **Non-slip, antistatic safety footwear**, with **anti-abrasion** and **anti-oil** sole. Comfort and prolonged well-being are guaranteed by the WingTex air tunnel **ultra-breathable lining** and U-Power Original **insole** with **self-modelling, anatomic and antibacterial** properties. **Men and women's lightweight safety shoes**, with sizes from 35 to 48.
