

Model: SCOTT s ESD

EU Norm: EN ISO 20344:2021

Article: 0RV20116

DESCRIPTION

Low-heeled safety shoes with ultra-breathable nylon upper and **abrasion-resistant scuff cap on the toe**, with tone-on-tone effect. **Ultra-light safety shoes** that feature an **innovative tread** obtained with a new generation PU compound, and a brand new **puncture-resistant textile insole** to protect the sole of the foot, both **super light** and which greatly reduce the overall weight of the shoe without compromising **safety** and **comfort**. **Non-slip footwear** with **anti-static, oil-resistant** and **abrasion-resistant sole**. **AirToe Aluminium toecap**, **self-modelling, anatomical** and **antibacterial insole** and **WingTex air tunnel lining** that ensures moisture absorption and dispersion. **Summer safety footwear**, suitable for both **men and women**, ideal for use in a dry environment and, in particular for: **warehouse workers, transport and logistics** sectors, **carpenters, electricians and craftsmen** in general.
