

**Model:** STONEWALL

**Article:** WMP249NO

### DESCRIPTION

The STONEWALL U-Power multi-hazard suit is designed to provide intrinsic protection against flame, electric arc, heat and chemical splashes, combining certified safety, robustness and freedom of movement in a single garment.

Made of 270 g/m<sup>2</sup> modacrylic-cotton-antistatic fabric, it is equipped with 5 cm flame-retardant reflective bands, washable up to 25 cycles at 60 °C, reinforced double-needle stitching, and a central covered zip with FR flap and Velcro. The adjustable cuffs with FR buttons, elasticated waist and numerous loops for communication devices or detectors ensure comfort and practicality at work.

The garment offers two front pockets, two cargo pockets and two back pockets, all with Velcro fastening and FR reflex details, complemented by FR silicone logos and printed fireproof pictograms, making STONEWALL ideal for high-risk professional environments.
