DESCRIPTION

Lightweight hi-top safety footwear with AirToe toe cap made of aluminium. **Water-repellent upper** made of soft Nubuck-effect microfibre. The use of the innovative, latest-generation PU mix sole for these **safety shoes** results in a **significant overall reduction in weight** of the footwear for improved performance and comfort during the working day. **Lighter safety shoes** thanks also to the use of the all-fabric **Save & Flex Air anti-perforation system** and the **U-Power Original anatomic insole** with self-modelling and antibacterial properties. **Hi-top safety shoes** with special **protection of the sole from the cold** (At temp. ≤ 10 °C.) which makes this style suitable in all work situations with frequent exposure to low temperatures and in damp environments, such as **transport & logistics**, for use by **warehouse workers**, **plumbers**, and **electricians**, etc. Men and women's **non-slip shoes with anti-abrasion**, **anti-oil** and **antistatic sole** and Wingtex® air tunnel **ultra-breathable lining**.

UPPER

Nubuck-effect, water-repellent microfibre

LINING

Wingtex® with breathable air tunnel

TOECAP

AirToe Aluminium

ANTIPERFORATION

Save & Flex Air

MIDSOLE

U-Power Original

SOLE/TREAD

New generation anti-abrasion, anti-oil, anti-slip and antistatic PU compound

ANATOMICAL INSOLE

Natural Confort 11 Mondopoint

SAVE & FLEX AIR

Save & Flex Air anti-perforation insert. Ultra-lightweight (extralight) protective insert designed to effectively protect the foot from nails and sharp objects without adding extra weight to the footwear. It provides high safety standards, flexibility, and full-foot plantar coverage, enhancing dynamic comfort during movement.

PROTECTION CLASS

S3S CI FO SR

EU NORM

EN ISO 20345:2022 S3S CI FO SR

SIZES

35-48 (UK: 2-13)

AIRTOE ALUMINIUM TOE CAP

Made from aluminium to combine lightness with protection, ensuring thermal and dynamic comfort for the foot. Weighing approximately 54 grams, it is designed to maintain high safety standards without adding weight to the footwear.

ESD (ELECTROSTATIC DISCHARGE)

Technology designed to continuously dissipate electrostatic charges accumulated by the human body to the ground. Certified footwear complies with the requirements of the CEI EN 61340 standards for the protection of electronic components, making it suitable for use in EPA (Electrostatic Protected Area) environments during both production and handling of sensitive devices.

U-POWER ORIGINAL

Anatomical footbed with arch support structure made from a soft dynamic BASF compound. It features self-moulding properties designed to evenly distribute body weight pressure across the sole of the foot, reducing pressure points and optimizing dynamic comfort.
