VENUS

WFU225AG

DESCRIPTION

This **pile fleece with zip** is made with an **innovative** micropile **Polartec Eco-Engineering** fabric using 100% **recycled material** obtained from plastic bottles. The model is an **eco-sustainable fleece**, **warm** and **soft**, which provides **superior performance** in terms of breathability, comfort and durability. In addition, the production process for the **Polartec** material adheres to the highest standards of compliance and responsibility in order to reduce the environmental impact. This **work fleece** is characterised by **hot press finishes** on the left side of the chest and the cuffs, whilst the right side has a reflective **print** of the **logo "U-Power"**. We are talking about a **sports fleece**, perfect at any time of the day, even for free time. **Venus** has **3 pockets**: 2 at the bottom and a vertical one on the chest, all **with zip** closure. **Fleece** in **sustainably-produced polar fabric** with reinforcements in contrasting stretch material on both the pockets and on the forearm and the bottom inner side. **Venus** is the perfect **pile fleece** for those who care about wearing a **quality product** with an eye to protecting the environment and combating plastic pollution. Ideal for **electricians**, **plumbers**, **painters**, **cleaning companies**, **farmers**, **hauliers**, **carpenters**, **installers**, **warehouse personnel**, **mechanics**, **builders**, **fishermen/women** and for **free time**.

SIZES

S-4XL

COMPOSITION

FABRIC: POLARTEC EcoEngineering 100% recycled polyester - 160 gr/m²
CONTRAST FABRIC: 90% nylon, 10% elastan - 260 gr/m²

POLARTEC® MICRO SERIES

FLEECE

Technical fleece made of 100% recycled PET, lightweight and highly thermal. The lofted structure creates air pockets that retain heat while ensuring breathability and quick drying. Comfort and reliability in all conditions.
