

Model: VERVE LADY

Article: WFU403GG

DESCRIPTION

The Verve technical jacket by U-Power is designed to provide comfort, functionality, and style in all weather conditions. Made from innovative softshell fabric with an inner graphene micro-fleece lining, it ensures even heat distribution for optimal comfort, regardless of external temperature.

The Verve jacket is designed for those who work on the move and need a versatile and durable garment. Equipped with a removable hood with elastic drawstring adjustment, it is water-repellent and ideal for facing any weather condition. Functional details include adjustable Velcro cuffs and an adjustable shaped hem with internal drawstring. The collar is lined with soft micro-fleece for added comfort.

Thanks to its multi-pocket design, this jacket offers ample storage space for everything you need. Two handwarmer pockets and two vertical chest pockets, all with zippers, are complemented by two large internal pockets. The waterproof central zipper closure provides protection against the elements, while the contrasting colored teeth of the right vertical pocket add a stylish touch.

Reflective details on the chest and back increase safety in low-light conditions. The modern design is completed by the reflective "U-Power" logo placed on the chest and back, and the reflective rubber "lion head" label on the right sleeve.

Available in four different color variants: Black Black, Deep Blue, Dark Green, Grey Grey.
