ZAFER ESD

LI10666

DESCRIPTION

A high work shoe with upper made of soft suede leather and padded gusset, designed to offer comfort and safety to the feet even during long working days. Equipped with a lightweight, impact-resistant aluminium Alutoe toecap, this shoe incorporates a SAFE-System anti-puncture system for effective protection against hazards from sharp materials. The Wind 3D lining promotes perfect internal ventilation, helping to keep the foot cool and dry. The PU sole has a lightweight heel and offers excellent non-slip grip on various surfaces, as well as high abrasion resistance. The Infinergy® insert reduces fatigue and returns energy with every step. BASF's ergonomic elastopan footbed, together with the PU and Infinergy® midsole, reduces fatigue through superior elastic response. S1PS FO SR certified protection, available in sizes 38 to 48.Also has the additional ESD requirement for use in environments with risk of electrical dissipation.

PROTECTION CLASS

S1PS FO SR
