

STRICKER

0UL20066

DESCRIPTION

The Stricker is a lightweight, high-performance safety shoe designed for comfort, protection, and breathability in demanding work environments.

It features a soft suede upper with textile inserts for flexibility and durability, combined with a 3D mesh lining that ensures excellent ventilation and moisture management. The AirToe Aluminum safety toe cap provides maximum protection with a streamlined, lightweight design.

Inside, a soft polyurethane dynamic footbed enhances all-day comfort, while the dual-density PU sole with Infinergy® midsole delivers superior cushioning, energy return, and resistance to slipping, oil, and abrasion.

The model is also static dissipative (SD 35 rated), making it suitable for environments where electrostatic control is required, while maintaining a modern charcoal/slate look.

UPPER

Soft suede upper with textile inserts

LINING

3D Mesh lining for superior breathability and moisture wicking

TOECAP

AirToe Aluminum, maximum protection with streamlined shape

ANTIPERFORATION

-
