DESCRIPTION

Water-repellent safety shoes with soft **microfiber Nubuck effect** upper. These **low-top Work Shoes**, with lightweight **AirToe Aluminium toe cap**, mount a new generation **ultra-light PU compound sole** that is **anti-abrasion**, **anti-oil**, **anti-slip** and **anti-static**. The brand-new **Puncture resistance** system, consisting of an **anti-puncture textile insole**, makes this style of **work shoes lighter** than traditional models. In fact, the use of highly innovative materials to make the sole and the Puncture resistance system, together with the **aluminum toe cap that weighs only 54 grams**, have enabled a **significant reduction in the overall weight of the work shoes** to the advantages of worker well-being and performance. **Safety footwear** with special protection of the sole from the cold, ideal for: **electricians**, **carpenters**, **craftsmen**, **warehouse workers**, **transport** and **logistics** sector. Comfort and foot health guaranteed by the **U-Power Original insole** made of lightweight polyurethane compound, comfortable and **breathable**, and the **air tunnel lining** that ensures the recirculation of air. **Safety shoes** suitable for **men and women**.

UPPER

Microfiber nubuck effect, water repellent

LINING

Wingtex® breathable air tunnel

TOECAP

AirToe Aluminium

ANTIPERFORATION

Save & Flex Air

MIDSOLE

U-Power Original

SOLE/TREAD

New generation PU compound anti-abrasion, anti-oil, anti-slip and anti-static

ANATOMICAL INSOLE

Natural Confort 11 Mondopoint

SAVE & FLEX AIR

Save & Flex Air anti-perforation insert. Ultra-lightweight (extralight) protective insert designed to effectively protect the foot from nails and sharp objects without adding extra weight to the footwear. It provides high safety standards, flexibility, and full-foot plantar coverage, enhancing dynamic comfort during movement.

AIRTOE ALUMINIUM TOE CAP

Made from aluminium to combine lightness with protection, ensuring thermal and dynamic comfort for the foot. Weighing approximately 54 grams, it is designed to maintain high safety standards without adding weight to the footwear.

ESD (ELECTROSTATIC DISCHARGE)

Technology designed to continuously dissipate electrostatic charges accumulated by the human body to the ground. Certified footwear complies with the requirements of the CEI EN 61340 standards for the protection of electronic components, making it suitable for use in EPA (Electrostatic Protected Area) environments during both production and handling of sensitive devices.

U-POWER ORIGINAL

Anatomical footbed with arch support structure made from a soft dynamic BASF compound. It features self-moulding properties designed to evenly distribute body weight pressure across the sole of the foot, reducing pressure points and optimizing dynamic comfort.
