

CLOVIS ESD

OUT10154

DESCRIPTION

Clovis safety shoes from U-Power offer **maximum safety** and **comfort in extreme environments** and adverse weather conditions. The **water-repellent pull-up leather upper**, combined with the **GORE-TEX® Performance membrane**, ensures perfect **water proofing** and **breathability**, keeping feet dry at all times. Safety is ensured by the ultralight and durable **FiberToe toe cap**, along with the **Save & Flex® PLUS** anti-puncture footbed that effectively protects against accidental punctures. The **abrasion-resistant**, **oil-resistant**, **anti-static** and **slip-resistant PU/PU outsole** ensures stability even on difficult and slippery terrain. **Included** inside the package are **three interchangeable U-Power original footbeds** to adapt the shoe to your personal needs and increase daily comfort. Ideal for construction, agriculture and outdoor environments, these shoes offer superior durability even in water, mud and extreme environmental conditions, ensuring long-term durability and reliability.

UPPER

Soft and durable water-repellent pull-up leather with TPU support heel. Extra reinforced PU toe cap

LINING

GORE-TEX Performance Membrane

TOECAP

Save & Flex® PLUS benefits

MIDSOLE

U-Power original

SOLE/TREAD

PU/PU, anti-abrasion, anti-oil, anti-slip and anti-static

ANATOMICAL INSOLE

Natural Confort 11-12-13 Mondpoint

GORE-TEX®

Thanks to the GORE-TEX® membrane, water stays out whilst sweat is wicked away, ensuring dry feet and optimal breathability in all working conditions. The technology also provides an effective barrier against the penetration of common chemicals, ensuring lasting protection and comfort throughout the day.

FIBERTOE TOE CAP

Fibertoe toe cap. Made from fibreglass to provide high mechanical resistance to impact and crushing. Weighing approximately 52 grams, it offers thermal insulation, flexibility and comfort, whilst keeping the footwear lightweight and safe.

SAVE & FLEX® PLUS

Save & Flex® PLUS anti-perforation insert. Textile, metal-free protective insert designed to provide superior lightness and flexibility compared to traditional steel plates. Sewn directly onto the upper, it ensures full-foot plantar protection. It offers sole penetration resistance up to 1100 N in compliance with current safety standards.

ESD (ELECTROSTATIC DISCHARGE)

Technology designed to continuously dissipate electrostatic charges accumulated by the human body to the ground. Certified footwear complies with the requirements of the CEI EN 61340 standards for the protection of electronic components, making it suitable for use in EPA (Electrostatic Protected Area) environments during both production and handling of sensitive devices.

U-POWER ORIGINAL

Anatomical footbed with arch support structure made from a soft dynamic BASF compound. It features self-moulding properties designed to evenly distribute body weight pressure across the sole of the foot, reducing pressure points and optimizing dynamic comfort.
