

Model: CURMA

Article: WSK139BC

DESCRIPTION

Sports-derived thermal underwear jersey. The massive presence of polypropylene makes this article light, breathable and at the same time offers excellent thermal insulation. Polypropylene, antibacterial by nature, combined with polyamide has allowed us to obtain a resistant and non-deformable fabric. Finally, the high elasticity means that the jersey dresses very snugly so as to achieve a "second skin" effect, which will be suitable for all operators working in cold environments or in unfavorable weather conditions.

COMPOSITION

57% POLYPROPYLENE - 34%
POLYAMIDE - 9% ELASTANE - 220
g/m².

SIZES

S/M-L/XL-2XL/3XL
