DRAX s ESD

0RI21334

DESCRIPTION

Water-repellent safety shoes made of soft Pull-up leather, abrasion-resistant and dynamic tensile strength and double string. PU reinforcement toe cap on the front of the shoe. These ESD anti-static shoes are particularly suitable for outdoor use in wet and cold environments such as construction site and construction sites, port areas, road work and road maintenance, installations, and all situations involving work on uneven terrain and treacherous surfaces. Shoes with AirToe Composite toe cap that protects the toe and "Metal Free" Save & Flex® PLUS Puncture resistance system that ensures the safety of the sole of the foot. Anatomical, breathable and antibacterial WOW2 footbed that ensures comfort and prolonged well-being, and Wingtex® air tunnel lining that absorbs and disperses moisture. Safety rating with special cold insulation of the bottom of the shoe. The Wingtex® air tunnel lining makes these safety shoes especially breathable, while the antibacterial, anatomical and ultra-breathable footbed ensures prolonged comfort.

PROTECTION CLASS

S3S CI FO SR

EU NORM

EN ISO 20345:2022 S3S CI FO SR

SIZES

38-48

UPPER

Water-repellent pull-up leather

TOECAP

AirToe Composite

MIDSOLE

WOW2

ANATOMICAL INSOLE

Natural Confort 11 Mondopoint®

LINING

Wingtex® breathable aria tunnel

ANTIPERFORATION

Save & Flex® PLUS®, "no metal" textile anti-puncture footbed

SOLE/TREAD

PU/PU, anti-abrasion, anti-oil, anti-slip and anti-static

AIRTOE COMPOSITE TOECAP

Airtoe Composite Toecap. A versatile solution made from a completely metal-free composite material. Weighing approximately 50 grams, it offers excellent thermal insulation and a lightweight design suitable for prolonged use in a variety of working environments.

SAVE & FLEX® PLUS

Save & Flex® PLUS anti-perforation insert. Textile, metal-free protective insert designed to provide superior lightness and flexibility compared to traditional steel plates. Sewn directly onto the upper, it ensures full-foot plantar protection. It offers sole penetration resistance up to 1100 N in compliance with current safety standards.

ESD (ELECTROSTATIC DISCHARGE)

Technology designed to continuously dissipate electrostatic charges accumulated by the human body to the ground. Certified footwear complies with the requirements of the CEI EN 61340 standards for the protection of electronic components, making it suitable for use in EPA (Electrostatic Protected Area) environments during both production and handling of sensitive devices.

WOW 2

Anatomical footbed composed of two technical elements: an arch support structure made from a dynamic BASF compound with self-moulding properties, designed to evenly distribute body weight, and an anti-fatigue insert made from a special BASF compound. This combination reduces bodily stress caused by prolonged standing, helping to minimize daily fatigue throughout the working day.
