

ERIS

WFU417AG

DESCRIPTION

This T-shirt stands out for its blended fabric made of cotton (75%) and Sorona® fiber (25%), combining natural softness, elasticity, and durability with a reduced environmental footprint. Sorona® fiber is partially sustainable, as it is derived in part from renewable plant-based resources (glucose of vegetal origin).
The material blend ensures a comfortable fit, long-lasting shape retention, and a lightweight feel against the skin. The design is enhanced by contrasting colored inserts on the sleeves and collar, adding character to the garment and making it ideal for both work and leisure.

SIZES

S-5XL

COMPOSITION

75 % Cotone • 25 % Sorona® • 180 g/m²

SORONA

Innovative and partially sustainable fiber, partly derived from renewable resources (plant-based glucose). Combines elasticity, wear resistance and comfort, delivering soft-touch and long-lasting performance. Its eco-friendly profile reduces environmental impact compared to traditional fibers.
