

Model: HALLEY

Article: WHL393YF

DESCRIPTION

The **Halley** rain suit is the ideal solution to protect you from rain and wind during your work days.

Consisting of a **jacket** and **overpants**, it is made of a **waterproof** and slightly **breathable fabric** that provides you with comfort and protection in all weather conditions.

The heat-taped seams ensure a complete waterproof seal. The jacket is designed for maximum safety: it features a front zipper closure and **reflective bands** sewn on the torso and sleeves for optimal visibility even in low-light environments.

The practical retractable hood in the collar allows you to always be ready for a sudden downpour. The overpants, with an elasticized waistband for a comfortable fit, have Velcro-closed loop pockets that give you easy access to clothing underneath.

Snap buttons on the leg bottoms allow you to adjust the fit. Reflective strips and heat-taped seams are also featured here for complete protection. This suit is designed to withstand up to 25 washes, keeping the technical and comfort qualities intact.

The product is available in 1-piece (code HL393) and 10-piece (code CY393) lots only.
