

JURA

WEY396GM

DESCRIPTION

The **Jura** work fleece is designed to provide you with maximum comfort and warmth on the coldest days.

Unlike classic styles, it is made of a thicker, more robust fabric that provides excellent thermal protection without sacrificing softness and **breathability**. This garment is designed for those seeking practicality and functionality.

It features two zippered **handwarmer** pockets and a handy chest pocket, also zippered, to keep your essentials safe and close at hand. The design is made more eye-catching by the front zipper with colorful teeth, which adds a modern and lively touch.

Choose Jura if you are looking for a garment that combines style, comfort and functionality in one, ideal for tackling any work challenge.
