

MONACO UK s ESD

ORI20414

DESCRIPTION

Low-top safety shoes with BOA® Fit System that provides a precise, micro-adjustable fit designed to perform in the harshest conditions. PUTEK STAR® upper is **water-repellent**, **breathable** and **highly abrasion-resistant**. The **ultra-breathable Wingtex®** air-tunnel **lining** provides the ideal microclimate, while the **WOW2 self-molding footbed** ensures prolonged comfort and well-being thanks to the **anti-fatigue insert** that relieves stress from prolonged standing and its ability to evenly distribute weight over the entire surface of the foot. **Anti-static**, **slip-resistant**, **oil-resistant** and **abrasion-resistant outsole**. **Monaco** is a **work shoe** that provides **special protection of the sole against the cold** by ensuring a higher temperature inside the shoe than outside for greater well-being and an ideal microclimate of the foot. Protection is provided by the ultralight **AirToe Composite toe cap** and the **Save&Flex Plus® Puncture resistance system**, sewn directly onto the upper to protect 100% of the foot surface. **Work shoes** suitable for various work sectors and, especially for: **warehouse worker**, **trucking and logistics**, **mechanic**, **tire repairman**, **painter**, **electrician**, **laborer and assembly line**, **gas station attendant**, **carpenter**, **craftsman**, **bricklayer**, **carpenter**, **plumber**.

UPPER

PUTEK STAR® highly abrasion-resistant, water-repellent and breathable

LINING

Wingtex® breathable air tunnel

TOECAP

AirToe Composite

ANTIPERFORATION

Save&Flex Benefits®

MIDSOLE

Antifatigue WOW2

SOLE/TREAD

PU/PU, anti-abrasion, anti-oil, anti-slip and anti-static

ANATOMICAL INSOLE

Natural Confort 11 Mondopoint

PU TEK STAR

A protective fabric featuring a geometric star pattern. It offers durability, flexibility and a PVC-free construction. Certified to ISO 20344:11, it provides air circulation and breathability four times greater than the minimum requirements for S3 safety footwear.

AIRTOE COMPOSITE TOECAP

AirToe Composite Toecap. A versatile solution made from a completely metal-free composite material. Weighing approximately 50 grams, it offers excellent thermal insulation and a lightweight design suitable for prolonged use in a variety of working environments.

SAVE & FLEX® PLUS

Save & Flex® PLUS anti-perforation insert. Textile, metal-free protective insert designed to provide superior lightness and flexibility compared to traditional steel plates. Sewn directly onto the upper, it ensures full-foot plantar protection. It offers sole penetration resistance up to 1100 N in compliance with current safety standards.

BOA® FIT SYSTEM

BOA® Closure System. Fast-lacing technology that replaces traditional shoelaces with a micro-adjustable dial, lightweight stainless-steel laces, and low-friction guides. Designed to provide a precise, even, and customized fit with a simple turn, it ensures stability and safety throughout the working day. The system is resistant to impacts, mud, and wear, and allows the footwear to be removed quickly when needed.

ESD (ELECTROSTATIC DISCHARGE)

Technology designed to continuously dissipate electrostatic charges accumulated by the human body to the ground. Certified footwear complies with the requirements of the CEI EN 61340 standards for the protection of electronic components, making it suitable for use in EPA (Electrostatic Protected Area) environments during both production and handling of sensitive devices.

WOW 2

Anatomical footbed composed of two technical elements: an arch support structure made from a dynamic BASF compound with self-moulding properties, designed to evenly distribute body weight, and an anti-fatigue insert made from a special BASF compound. This combination reduces bodily stress caused by prolonged standing, helping to minimize daily fatigue throughout the working day.
