NORDLUX

WHL382OF

DESCRIPTION

The NORDLUX U-Power parka is designed to provide maximum protection, comfort and visibility during outdoor activities in the colder months.
Made of durable, waterproof and breathable fabric with heat-taped seams, it provides total protection against rain and moisture without compromising breathability. The two-tone design maintains a clean, professional appearance while hiding dirt in the most exposed areas.
Equipped with heat-sealed segmented reflective bands on the torso, sleeves and shoulders to ensure safety even in low-light conditions. The central covered zipper closure protects from the elements, while an adjustable, detachable hood and micro fleece on the collar provide additional comfort.
The parka includes two large zippered front pockets, multifunctional chest pocket with Velcro, pen pocket, D-ring badge holder, vertical zippered pocket and side Napoleon pocket, as well as internal mesh pocket pouches and internal back opening for personalization.
NORDLUX is the ideal garment for those seeking functionality, thermal protection and high visibility in one technical work parka.
