

Model: ROCK

Article: WDW361BC

DESCRIPTION

Rock work pants are the perfect choice for those seeking durability and freedom of movement without compromise.

Made of durable **cotton/polyester stretch** fabric, they offer prolonged comfort thanks to stretch inserts at the waist that adjust to your every movement. The fabric is also **breathable**, to keep you feeling cool even during the busiest days.

Sturdiness is a strong point: triple stitching and an accentuated back yoke provide added protection for the lumbar area. Polioxford knee-pad pockets, with Velcro-closed bottom entry, are designed for maximum convenience and compatible with the EN 14404-certified **ergonomic knee-pad** (Type 2, Level 1) art. GC061BC.

The bottom of the pants can be lengthened by 2 inches for a custom-made fit. Functional and practical, Rock pants have numerous pockets to keep all your tools close at hand: two large front pockets, two back pockets with flaps and Velcro, and a zippered coin pocket.

A multifunctional side pocket with Velcro holds a convenient retractable **badge holder**, while a **meter** pocket and **hammer webbing** complete the outfit. For extra security, the design is enhanced by **reflex inserts** below the knee, on the side pocket and on the back pockets, which increase your visibility in low-light conditions.

A soft plastic **D-ring** and central zipper and rubberized scratch-resistant button closure make the garment even more rugged and reliable.
