## DESCRIPTION

Low-top work shoes with special **sole protection from cold** (A temp. ≤ 10 °C.) ideal in humid environment and climate with low temperatures. **Super lightweight safety shoes** with soft **water-repellent** Nubuck effect microfiber upper and innovative new generation ultralight PU compound outsole that greatly reduces the weight of the shoe while providing maximum grip and grip. **Non-slip, anti-abrasion** , **anti-oil** and **anti-static outsole** . The Save & Flex Air textile **anti-puncture resistance system** and **AirToe Aluminium toe cap** provide foot protection, while the U-Power Original **insole with antibacterial** , **anatomical** and **self-molding properties** , together with the **ultra-breathable** Wingtex® air tunnel **lining** , ensure foot health and **prolonged comfort** . **Safety shoes for electricians** , **carpenters** , **craftsmen** , **warehousemen** , **transportation & logistics** with sizes 35 to 48 suitable for both men and women.

## PROTECTION CLASS

S3S CI FO SR

## EU NORM

EN ISO 20345:2022 S3S CI FO SR

## SIZES

35-48

## UPPER

Microfiber nubuck effect, water repellent

## LINING

Wingtex® breathable aria tunnel

## TOECAP

AirToe Aluminium

## ANTIPERFORATION

Save & Flex Air

## MIDSOLE

U-Power Original

## SOLE/TREAD

New generation PU compound anti-abrasion, anti-oil, anti-slip and anti-static

## ANATOMICAL INSOLE

Natural Confort 11 Mondopoint

## SAVE & FLEX AIR

Save & Flex Air anti-perforation insert. Ultra-lightweight (extralight) protective insert designed to effectively protect the foot from nails and sharp objects without adding extra weight to the footwear. It provides high safety standards, flexibility, and full-foot plantar coverage, enhancing dynamic comfort during movement.

## AIRTOE ALUMINIUM TOE CAP

Made from aluminium to combine lightness with protection, ensuring thermal and dynamic comfort for the foot. Weighing approximately 54 grams, it is designed to maintain high safety standards without adding weight to the footwear.

## ESD (ELECTROSTATIC DISCHARGE)

Technology designed to continuously dissipate electrostatic charges accumulated by the human body to the ground. Certified footwear complies with the requirements of the CEI EN 61340 standards for the protection of electronic components, making it suitable for use in EPA (Electrostatic Protected Area) environments during both production and handling of sensitive devices.

## U-POWER ORIGINAL

Anatomical footbed with arch support structure made from a soft dynamic BASF compound. It features self-moulding properties designed to evenly distribute body weight pressure across the sole of the foot, reducing pressure points and optimizing dynamic comfort.
