

STONEWALL

WMP249NO

DESCRIPTION

U-Power's STONEWALL U-Power multi-risk full suit is designed to provide inherent protection against flame, electric arc, heat and chemical splashes, combining certified safety, strength and freedom of movement in one garment. Made of 270 g/m^2 modacrylic-cotton-antistatic fabric, it features 5 cm flame-retardant reflective bands, washable up to 25 cycles at 60 °C, reinforced double-needle stitching, and a covered center zipper with FR flap and Velcro. Adjustable FR button cuffs, an elasticized waistband, and numerous loops for communication devices or detectors ensure comfort and practicality on the job. The garment offers two front pockets, two cargo pockets and two back pockets, all with Velcro closure and FR reflex details, complemented by FR silicone logos and printed flame-retardant pictograms, making STONEWALL ideal for high-risk professional environments.
