

Model: **STOUT**

Article: WSY356GM

DESCRIPTION

Stout work pants are made of a durable **polyester/cotton stretch** fabric , designed to give you maximum freedom of movement in any situation. With stretch inserts in the waistband and inner thigh, these pants conform to your body and provide extended comfort throughout the day. The fabric is also **breathable** and **quick-drying** , a key feature for those working in dynamic environments. Designed to last, they feature triple stitching and **Cordura** inserts in the places most prone to wear, such as the **heel pad** , front pocket piping and the bottom of the back pockets. The accentuated back yoke provides extra protection for the lumbar area, while the central zipper and **rubberized scratch-resistant button** closure ensures lasting practicality. Stout is a multi-pocket pant that allows you to have everything at your fingertips at all times. You'll find two large front pockets, two back pockets with flaps and Velcro, and a zippered coin pocket. There are also two multifunctional side pockets: a cell phone pocket with adjustment Velcro and one that holds a concealed badge holder. Rounding out the functionality are a tape measure pocket and a hammer holder webbing. For your safety, the design is enhanced by **reflex inserts** below the knee, on the back and side pockets, which increase your visibility. In addition, the Cordura knee-pad pockets are compatible with the EN 14404-certified **ergonomic knee pad** (Art. GC061BC), providing extra protection for your knees. Stout pants are the ideal choice for all professionals looking for a rugged, comfortable and functional garment.
