

TERES LADY

WFU418TO

DESCRIPTION

The TERES Lady U-Power technical T-shirt is designed to deliver high performance during high-intensity activities. Made of nylon (87%) and elastane (13%), it combines light weight, strength and flexibility, ensuring a dynamic fit that follows every movement.
The stretch fabric promotes quick drying and effective moisture management, while mesh inserts placed under the armpits increase breathability and ventilation in areas most prone to perspiration. The result is consistent comfort even during prolonged exertion, ideal for sports and dynamic activities.

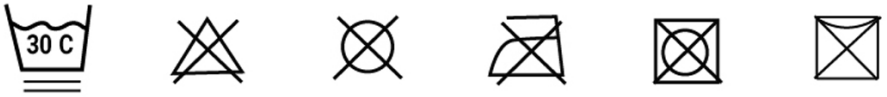

SIZES

XS-4XL

COMPOSITION

Fabric: 87% Nylon - 13% Elastane - 170 gr/m2 Contrast fabric: 87%Nylon, 13% Elastane -160 gr/m2
