DESCRIPTION

Lightweight high safety shoes with aluminum AirToe **toe cap** . **Water-repellent upper** in soft microfiber Nubuck effect. The sole in innovative new-generation PU compound of these **work shoes** allows a **significant reduction in the** overall **weight of** the shoe, which advantages performance and well-being during work. **Lighter safety shoes** also thanks to the presence of the new totally textile **Save & Flex Air Puncture resistance system** and the **anatomical U-Power Original insole** with self-molding and antibacterial properties. **Low-top safety shoes** with special **sole protection from the cold** (A temp ≤ 10 °C.) making the style suitable in all work situations with frequent exposure to low temperatures and wet environment, such as **transportation & logistics** , **warehouse worker** , **electrician** , **plumber** , etc. Men's and women's **slip-resistant shoes** with **anti-abrasion** , **anti-oil** and **anti-static soles** and **ultra-breathable** Wingtex® air tunnel **lining** .

UPPER

Microfiber nubuck effect, water repellent

LINING

Wingtex® breathable aria tunnel

TOECAP

AirToe Aluminium

ANTIPERFORATION

Save & Flex Air

MIDSOLE

U-Power Original

SOLE/TREAD

New generation PU compound anti-abrasion, anti-oil, anti-slip and anti-static

ANATOMICAL INSOLE

Natural Confort 11 Mondopoint

SAVE & FLEX AIR

Save & Flex Air anti-perforation insert. Ultra-lightweight (extralight) protective insert designed to effectively protect the foot from nails and sharp objects without adding extra weight to the footwear. It provides high safety standards, flexibility, and full-foot plantar coverage, enhancing dynamic comfort during movement.

PROTECTION CLASS

S3S CI FO SR

EU NORM

EN ISO 20345:2022 S3S CI FO SR

SIZES

35-48

AIRTOE ALUMINIUM TOE CAP

Made from aluminium to combine lightness with protection, ensuring thermal and dynamic comfort for the foot. Weighing approximately 54 grams, it is designed to maintain high safety standards without adding weight to the footwear.

ESD (ELECTROSTATIC DISCHARGE)

Technology designed to continuously dissipate electrostatic charges accumulated by the human body to the ground. Certified footwear complies with the requirements of the CEI EN 61340 standards for the protection of electronic components, making it suitable for use in EPA (Electrostatic Protected Area) environments during both production and handling of sensitive devices.

U-POWER ORIGINAL

Anatomical footbed with arch support structure made from a soft dynamic BASF compound. It features self-moulding properties designed to evenly distribute body weight pressure across the sole of the foot, reducing pressure points and optimizing dynamic comfort.
