VENUS

WFU225BO

DESCRIPTION

This **zippered fleece** sweatshirt is made from an **innovative Polartec Eco-Engineering microfleece fabric** sourced from 100% **recycled material** obtained from plastic bottles. The style constitutes an **environmentally sustainable**, **warm** and **soft sweatshirt** that provides **high performance** in breathability, comfort and durability. In addition, the manufacturing process of the **Polartec** material follows the highest standards of compliance and accountability to reduce environmental impact. This **work sweatshirt** features **hot press trim** on the left side of the chest and cuffs, while the right side features a reflective **print** of the "**U-Power**" **logo**. We are talking about a **sporty sweatshirt**, ideal at any time of the day, even during leisure time. **Venus** has **3 pockets**: 2 on the bottom and a vertical chest pocket, all **with zippers**. **Sweatshirt** made of **sustainably produced polar fabric** with contrasting stretch material reinforcements on both pockets and forearm and bottom inner side. **Venus** is the perfect **fleece sweatshirt** for those who care about wearing a **quality product** with a focus on protecting the environment and combating plastic pollution. Ideal for **electricians**, **plumbers**, **painters**, **cleaners**, **farmers**, **truck drivers**, **carpenters**, **installers**, **warehouse workers**, **mechanics**, **bricklayers**, **fishermen** and **recreationists**.
